

# Islamic Architecture

Local cultures will have their own impact on architecture as Islam spreads but some elements of Islamic architecture are traceable no matter how much local influence is injected.

## Horseshoe Arch

- Origin unknown
- Some say Umayyad, others say Visigoth (Spain), and still others say Byzantine or Sassanid

Compare to this Roman Arch

# Pointed Arch

- First used by Byzantines it will become the characteristic arch of Islamic Architecture
- Later it becomes a center of Gothic Medieval Architecture

# Scalloped Arch

- Variation on the Horseshoe Arch

# Arabesque

- Means repeating geometrical patterns
- Major feature of Islamic Architecture due to fact that they do not depict living things in their art.

# Calligraphy

- Quotations from Qur'an
- Emphasizes Islam and the unification of their empire due to fact all had to learn Arabic to become Muslim or pay Jizya.

# Hypostyle

- Greek word meaning “under columns
- Not specific to Islam but used extensively in

a mosque’s prayer hall which had to be a large room

# Minaret

- Used to call Muslims to prayer
- Word originates from the term for “an object that gives light”
- First mosques did not have minarets.
- Can vary drastically depending on local cultural influences

Oldest Standing Minaret

# Large Courtyards

- The actual meeting place in the first mosque Muhammad built had a courtyard which is where the people gathered to pray.
- Mosques are multipurpose buildings and serve religious, political and cultural roles. Courtyard= Town Square
- Symbolically separates the outside world from the prayer hall (mentally prepare)

Dome of the Madarsa-1-Shah at Isfahan (Iran)

# Large Domes

- Again, not a unique feature of Muslim architecture as the Greeks and Romans perfected the dome
- The Dome of the Rock (right) is one of the holiest sites of Islam and was patterned off of nearby Byzantine churches and Byzantine workers help to build it.
- Sometimes the domes are pointed at the top.

# Mihrab

- Is a niche built into the wall of the Mosque which is usually accompanied by a pulpit
- The Mihrab indicates the direction of the Kaaba (الكعبة) in Mecca which is the direction Muslims face when they pray.

# Other Elements

- Bright Colors
- Symmetric Design
- Ablution Fountains
- Focus put into interiors rather than exteriors  
“beauty of the veil”

An ablution fountain is where Muslims perform a ritual washing before entering for prayer. It is usually located in the courtyard.
